

SYSTEMS AND METHODS FOR OPTIMAL DISTRIBUTION OF
SYMBOLS IN A FIXED SIZE DATA PACKET
TO IMPROVE RECEIVER PERFORMANCE

5

ABSTRACT OF THE DISCLOSURE

There is disclosed a transmitter for transmitting a stream of known symbols and unknown symbols through a transmission channel to a first receiver that receives the transmitted stream of known symbols and unknown symbols distorted by intersymbol interference (ISI) and reduces therein an ISI signal. The transmitter comprises a known symbol distribution controller capable of inserting a plurality of known symbol clusters into an outgoing stream of unknown symbols in an optimum distribution in order to improve the performance of the first receiver.
